The diagram illustrates a sequence of four data transfers over a 4-bit bus. Each transfer is represented by a horizontal bar. The first three bars are labeled O1, O2, and O3, with a fourth bar labeled O4. Each bar is divided into a data phase (labeled O1, O2, O3, O4) and a 'BYE' phase. The 'BYE' phases are grouped by a bracket on the right, indicating they are not part of the data transfer. A horizontal line on the right indicates the continuation of the bus.
